# WIRED KEYBOARD

1 Plug in Satechi Aluminum Wired Keyboard into iMac's USB-A port.

2 On MacOS, "Keyboard Setup Assistant" may show when first connecting the Keyboard. Follow the on-screen instructions to identify keyboard before first use.

3 Use media/function keys for convenient MacOS shortcuts.
Function keys were designed for MacOS and may vary based on OS.

4 Unplug and replug the keyboard if you experience any issues. Open Keyboard icon in System Preferences and click "Change Keyboard Type" to re-identify the keyboard.
